Introduction: The Social/Societal Issues Cross Domain

InterPARES Trust features five major research domains and five cross domains. Cross domains address topics and issues relevant to the five core research domains: Infrastructure, Security, Control, Access, and Legal.¹ One of the cross domains pertinent to these major domains is “Social/Societal Issues,” which InterPARES Trust describes as follows:

“This cross domain is concerned with the analysis of social change consequent to the use of the Internet, including but not limited to use/misuse of social media of all types, trustworthiness of news, data leaks (intentional or accidental/force majeure) [and] consequences, development issues (power balance in a global perspective), organizational culture issues, and individual behaviour issues.”²

Currently, ten research projects from four international teams fall within the Social/Societal Issues cross domain:

Team Asia

AS08 - “Exploration of Electronic Records’ Authenticity: Social Awareness”

AS10 - “Publication of Government Records on Social Media as a Means of Internet Governance”

Team North America

NA04 - “Putting the “Fun” Back in “Functional”

NA05 - “Social Media and Trust in Government”

NA11 - “Historical Study of Cloud-Based Services”

NA20 - “Role of Cyber Tools and Social Media in the Development of the Ukraine Crisis”

NA24 - “Documentary Video on the Role of Records Processes and Democracy”

Team Latin America

LA04 – “Records in the Cloud Survey in Mexico and Then Beyond” (Team Latin America, LA04)

Team Europe

EU12 - “Social and Ethical Foundations of Preservation of Digital Historical-Cultural Heritage”

EU13 - “The Materiality of Records and Attributes of Trust”

In what follows, the research dissemination from each project is briefly summarized.

¹ InterPARES Trust, “Research--Domains,” accessed January 17, 2017, https://interparestrust.org/trust/about_research/domains.

⁵ Ibid.

“Publication of Government Records on Social Media as a Means of Internet Governance” (AS10)⁶

The widespread use of owned media such as microblog, we-chat, blog, etc., not only has brought great challenges for the traditional media, but also is changing the way of government information disclosure in public emergencies. In the project, the researcher will review the related theories in We Media communication and information disclosure in order to explore the principles in and set up a mechanism for government information disclosure. Evaluation of the reality in Chinese government information disclosure in owned-media will also be included, and suggestions will be posed according to the result of theoretical study mentioned before.⁷

Lead researcher: Sherry Xie

Additional researchers: Guanyan (Amelie) Fan, Wei Jiang

Timeline: February 2015-June 2016

Privately available research dissemination:

Fan, Guanyan. “Research Project Proposal: Disclosure of Chinese Government Information” (InterPARES Trust, 2015):

https://interparestrust.org/docs/file/AS10_20150217_DisclosureChineseGovtInfo_Proposal_Final.pdf.

Anticipated research dissemination:

- One article being drafted by Guanyan Fan, Sherry Xie, and Wei Jiang based on a literature review about freedom of information in China.
- Literature review on the use of WeChat Public in government activities. This literature review comprises a review of government policies and a review of relevant academic work.

⁶ Please note that on the public-facing InterPARES website this project is still titled “Disclosure of Chinese Government Information.”

Team North America

“Putting the “Fun” Back in “Functional”” (NA04)

This research looks at trust relationships from the perspective of the creators and internal users of organizational information/records and relevant systems/technologies. Its ultimate goal is to improve such relationships by positively influencing the way in which individuals perceive their work practices and the tools they use to accomplish them. The project also explores some of the socio-technical factors that appear to affect the management of written and non-written information in organizations. From a theoretical perspective, the research will provide insights into the 'intersubjective' (Smart 2006) domain of shared perceptions and understandings that has an impact on, and is influenced by, the way we trust information objects, people, and technology.

Lead researcher: Fiorella Foscarini

Additional researchers: Gillian Oliver, Jim Suderman, Weimei Pan, Lisa Daulby, Rachel de Brouwer, Jennifer Vanderfluit

“Social Media and Trust in Government” (NA05)

The goal of this research project is to develop two or more case studies that analyze the citizen experience with government social media tools and use, with respect to issues of trust, including concepts of openness, transparency, accountability, and authenticity. The first phase of the project will explore the types of social media initiatives undertaken by several government organizations in the US and an equal number in Canada to determine how they utilize social media to engage citizens and provide customer service, as well as how the public reacts to those initiatives.

“Historical Study of Cloud-Based Services” (NA11)

This project will explore aspects of the foundations of trusting Cloud-Based Services (CBS) and will identify, to the degree possible, those CBS that suffered significant loss of trust by the user community. The outcome of the research will take the form of an annotated bibliography covered by a short essay summarizing the method of research, the reasons why trust was lost/regained, criteria on which loss or return of trust would be based, and patterns or observations from the bibliography.⁸

“Role of Cyber Tools and Social Media in the Development of the Ukraine Crisis” (NA20)

It seems that the modern cyber- and information and communication technologies (ICTs), both the Internet-based and cellular, including social media, play an important role in the development of the ongoing Ukrainian crisis which started in November 2013. Based on exploring this major evolving case, our research goal is to develop a theoretical framework outlining the input of the modern ICTs into the development of the contentious socio-political crisis having a globally-important geopolitical impact.

“Documentary Video on the Role of Records Processes and Democracy” (NA24)

In order to have a healthy democracy, the decisions and activities of government and crown corporations must be properly captured, managed and preserved as records. There is considerable concern regarding the responsibility of government and organizations to act in a transparent and accountable manner through routine records creation, management and preservation. This 20-minute documentary will highlight the relationship between records processes and democracy, by asking the following questions: 1. How does proper records creation, management and preservation help your work, and why is it vital to the functioning of your organization? 2. Why and how do you properly generate, capture, manage, use and preserve government records?⁹

Lead researcher: Darrell Evans

https://interparestrust.org/docs/file/NA24_20160518_RKDocumentary_NAWorkshop7_Proposal_Final.pdf.

Anticipated research dissemination:

- 20-30 minute documentary highlighting the importance to healthy democracy of proper creation, management, and preservation of government records. This documentary will incorporate in-person interviews, process-based action, still photographs, illustrations, and potentially animation. It will be intended for students in law, political science, journalism, and administrative fields, as well as freedom of information practitioners working in Canadian governments and crown corporations.

Team Latin America

“Records in the Cloud Survey in Mexico and Then Beyond” (LA04)

This survey in Spanish about records in the cloud is similar to the survey launched by the Records in the Cloud project (www.recordsinthecloud.org) in order to get a comprehensive view from the perspective of the user in the Latin American Region and to compare the results with those obtained in previous surveys. The survey will then be conducted in Portuguese.¹⁰

Team Europe

“Social and Ethical Foundations of Preservation of Digital Historical-Cultural Heritage” (EU12)

The Project consists of three interconnected subprojects. Sub-Project 1: “Conditions of preservation of digital historical-cultural heritage on archives and museums websites of Ukraine” which is directed on the elaboration of policy for preservation of digital historical-cultural heritage and development of social and ethical recommendations for online access to these documents. Sub-project 2 “Policies and Standards for Online Access and Preservation of e-Government Content and Services” is directed on development of the best standards for practice and recommendations to provide e-government. Sub-Project 3 “Development of social and ethical guidelines for retention of digital historical-cultural heritage on archives and museums websites and elaboration of model policy of access and preservation of e-government services in Ukraine” is the final synthesized applied research. The purpose of the project is to develop the policy for management of digital documents which are on the web-sites of regional state archives and local history museums of Ukraine.

Researchers:

The project’s research group consists of faculty, post-graduate students, and students of the Department of History and Records Management in the Institute of Humanities at the National Aviation University (Ukraine). The head of the research group, Iryna Tiurmenko, has a Doctor of Sciences (History) and is a Professor within and head of the Department of History and Records Management. Other members of the research group include the following: Mariya Rohozha, Doctor of Sciences (History), Professor; Lyudmila Bozhuk, Candidate of Sciences (History); Tetiana Kurchenko, Candidate of Sciences (History), Docent; Lesya Haletska, Candidate of Sciences (History). Faculty members participated at different stages of the project include the following: Svitlana Lytvynska, Candidate of Sciences (Philology), Docent; post-graduate students Oksana Klimchiuk, Zoryana Sverdlyk; students: Maryna Demyda, Martha Kushnir, Tetyana Tsvyd.

Timeline: February 2014-February 2016; three phases

Results of sub-project 1:

- I. Tiurmenko elaborated methodology of the expert evaluation of the regional state archives web-sites system;
- T. Kurchenko clarified the evaluation methodology for local history museums web-sites;
- I. Tiurmenko, L. Bozhuk analyzed state and conditions of preservation of digital historical-cultural heritage, and dynamics of changes during 2014-2016 at web-sites of regional state archives of Ukraine;
- T. Kurchenko, L. Haletska analyzed state and conditions of preservation of digital historical-cultural heritage, and dynamics of changes during 2014-2016 at web-sites of local history museums of Ukraine;

- I. Tiurmenko, M. Rohozha, L. Bozhuk, T. Kurchenko, L. Haletska analyzed foreign experience of on-line access to historical and cultural heritage;
- M. Rohozha researched social and ethical grounds for preserving digital historic-cultural heritage;
- I. Tiurmenko and T. Kurchenko developed recommendations for social dimension of policy of preservation of digital historical-cultural heritage on archives and museums websites of Ukraine; M. Rohozha developed ethical dimension.

Anticipated research dissemination:

- The research group has finished working on a monograph and is preparing it for publication.

“The Materiality of Records and Attributes of Trust” (EU13)

The basic assumptions of this project is that materiality, including artefactual form and visual representations, is framing the contextual and purposive constituents of records. Materiality is a carrier of meaning, and mediates the interpretation, understanding and use of records, and thus the conception of trustworthiness. The Internet adds further complexity to the issue. Records are always relational, but on the Internet they are entangled in an almost ubiquitous and boundless network of information constructs, systems, technical infrastructure and institutions. The purpose of this project is to explore the concept of materiality and its relevance for archival theory in order to establish a framework for further research and development.

Lead researcher: Anneli Sundqvist

Timeline: October 2014-December 2015
