21. Archival Science Colloquium International Symposium

In cooperation with InterPARES Trust (ITrust)

8th June 2016

Technology and Congress Center
Technologie- und Tagungszentrum Marburg
(TTZ)

Born Digital in the Cloud: Challenges and Solutions

Trustworthiness is crucial for digital archives. Archivists need policies, standards and procedures to warrant the trustworthiness of digital archives when they make them accessible on the internet and exchange data online, as well as a secure environment. They also need such instruments to ensure the trustworthiness of archives created, used and preserved in cloud environments. At this International Symposium InterPARES Trust and German archives researchers will present their findings on these issues and discuss them with German archivists.

The first panel will discuss "Access in the Cloud" including open government strategies. "Control in the Cloud" is the theme of the second panel, which will focus on issues such as how to manage contracts with providers of cloud services.

Marburg Archives School is a partner of InterPARES Trust since 2013. "InterPARES Trust (ITrust 2013-2018) is a multi-national, interdisciplinary research project exploring issues concerning digital records and data entrusted to the Internet. Its goal is to generate theoretical and methodological frameworks to develop local, national and international policies, procedures, regulations, standards and legislation, in order to ensure public trust grounded on evidence of good governance, a strong digital economy and a persistent digital memory." (<https://interparestrust.org/trust>).

The International Symposium is open to all archivists and other researchers interested in trustworthy digital archives in the cloud.
